

# Gaza Strip: Power Deficit

(as of 21 August 2014)

## GAZA STRIP TOTAL

Percentage of demand met

Demand 470 mW  
Available 148 mW

Gaza's sole power plant remains shut down after being shelled on 29 July. According to the Palestinian Energy Authority, repairs could take months to complete, exacerbating the Gazan electricity crisis. This will affect private households, companies and public services provision, including water, sanitation and health facilities.

**18** hours of scheduled electricity outages are implemented across Gaza.
